

# Smart Gateway

LoRaWAN compatible Smart gateway receives measurement values from up to 8000 nearby devices, and connects to the Internet via wired, wireless or GSM dongle connection. The gateway is pre-configured to send device data to Sensefarm's services. Through the internal web interface, it can be configured for other networks as a standard LoRaWAN gateway.

## Accessories

Power adapter included.

Offgrid package with solar cell, solar charger, battery, GSM dongle and housing for outdoor mounting on 60 mm pole. Allows to create LoRaWAN networks where power and internet is not available.

External antenna for increased coverage.
